DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 8-11, drawn to methods of detecting rare mutations with flanking primers.

Group II, claim(s) 7 and 12, drawn to methods of detecting rare mutations with primers designed to allele-specifically amplify the rare mutation containing nucleic acid.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The methods encompass mutually exclusive subject matter, since the methods of Group I require flanking primers, which according to paragraph 036 of the specification as filed are designed so as to amplify both wildtype and mutant DNAs. Group II on the other hand requires amplification primers designed to specifically amplify the mutated allele. Otherwise Groups I and II share only the remaining features of claims 1 and 7. However, claim 1 is anticipated by Xue et al (US 2003/0017487, cited on the IDS of 08/17/2006; see figures 6, 7 and paragraphs [0008], [0015]). Therefore, since the limitations of claim 1 are the only features shared by all claims of Groups I and II, there is no special technical feature left which unifies the invention of Groups I and II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
